BRAKE WHEEL KIT

**CONSTRUCTED
TO OUTLAST**

RUNS COOLER. STOPS FASTER. LASTS LONGER.

HOW DOES SILVERBACKHD LOWER YOUR COST PER MILE?

Steel Shoe

- Brand new, NO CORE.
- Heat-treated cam and anchor ends help ensure structural integrity that maximizes braking and minimizes heat load.
- High voltage electro-deposition coating enables SilverbackHD to be the only manufacturer providing a lifetime warranty against rust jacking on every shoe.

Ceramic Enhanced Friction

- Cooler wheel ends.
- Temperatures 200°F to 250°F lower than competitive semi-metallic frictions..
- Achieve cost savings by increasing brake and wheel end component life cycles.

Premium OE-Grade Hardware Kits

- Powder-coated return spring for extended service life.
- Knurled pattern cam rollers are heat treated and zinc-dichromate coated to avoid flat spotting and corrosion.

Extend the lifespan of your brakes and lower your cost per mile
